WORK PLAN

&

METHODOLOGY
5. WORK PLAN

➢ Work Completed –
  o Study of different Artificial Neural Network Algorithms.
  o Study of Matlab- Neural Networks Toolbox
  o Study of Sharemarket.
  o Study of Literature Survey.

➢ Work Ahead –
  o Select the type of NN to analyse the forecasting market system.
  o Collect the database i.e. price index values of certain companies for few years.
  o Arrange the database.
  o Train the Neural Network according to the selected algorithm.
  o Apply the NN to the statement problem.
