1. HYPOTHESIS OF THE STUDY

The following hypotheses are formulated to empirically validate the above objectives:

1. There will be a significant difference between the mean score of Commerce College with respect to male and female students of Ahmedabad city.

2. There will be a significant difference between the mean score of Commerce College with respect to granted and non-granted schools of Ahmedabad city.

3. There will be a significant difference between the mean score of Commerce College with respect to their medium of instruction (English vs. non-English/regional medium) of Ahmedabad city.

4. There will be a significant difference between the mean score of Commerce College with respect to their environmental background (parents’ educational and students’ urban and rural areas) of Ahmedabad city.

5. There will be a significant difference between the mean score of Commerce College with respect to first and third semester of Ahmedabad city.
