RESEARCH METHODOLOGY

The entire work is mostly depends upon the secondary data source and the required relevant information will be collected through personal interviews as primary data if necessary.

The required secondary data will be collected from the District Census, Handbooks, District statistical abstract, Tahsildar offices, Govt. Statistical Reports, information through internet, magazines, documents and e-books.

The collected data will be processed, Tabulized and presented through proper cartographic techniques. E.g. Graphs, Maps, Pie charts etc. in the study, structure of population and the statistical models will be utilized.
