Hypothesis of the study

• There will be no significant difference between the mean score of Environmental Awareness of School Teachers of Ahmedabad City having different gender.

• There will be no significant difference between the mean score of Environmental Awareness of School Teachers of Ahmedabad City having different gender teaching in Granted and Non Granted schools.

• There will be no significant difference between the mean score of Environmental Awareness of School Teachers of Ahmedabad City having different gender teaching in Gujarati and English medium schools.

• There will be no significant difference between the mean score of Environmental Awareness of School Teachers of Ahmedabad City teaching Granted and Non Granted schools.

• There will be no significant difference between the mean score of Environmental Awareness of School Teachers of Ahmedabad City teaching Granted and Non Granted schools having different gender.

• There will be no significant difference between the mean score of Environmental Awareness of School Teachers of Ahmedabad City teaching Granted and Non Granted schools of Gujarati and English medium schools.

• There will be no significant difference between the mean score of Environmental Awareness of School Teachers of Ahmedabad City teaching in Gujarati and English medium schools.
• There will be no significant difference between the mean score of Environmental Awareness of School Teachers of Ahmedabad City teaching in Gujarati and English medium having different gender.

• There will be no significant difference between the mean score of Environmental Awareness of School Teachers of Ahmedabad City teaching in Gujarati and English medium Granted and Non Granted schools.

**Importance of the Study**

There is no doubt that attention to environment was overdue and it is time to commit ourselves to look after it with all possible means. It is a moral imperative and prerequisite for environment sustainability. Manning thereby that there is also a need of an environmental ethics because environment has gone beyond wildlife, pollution and man-made ugliness. It now extends to the very mind and spirit of human being. The importance of the study lies in the fact that teachers play a pivotal role in spreading awareness to the coming generation so it’s necessary to know their knowledge about environment and enhance it accordingly.
