WORK PLAN AND METHODOLOGY

Step I: Formulation of research problem:
From various sources such as papers published on this topic, the unsolved problems are found out and a problem is selected.

Step II: Literature review:
By referring different books of this subject and the different papers published on this topic, the work done in this area is studied which helps in solving the proposed problem.

Step III: Conceptual framework:
The terms and symbols used their exact meaning is found out and studied.

Step IV: Hypothesis building:

Step V: Coverage:

Step VI: Data collection:

Step VII: Data analysis:

Step VIII: Budget allocation and time:
- Adequate time
- Continuous process
