WORK PLAN
The research work completed within four phases

Part I) First Year
Phase I (September 2012 to February 2013)
This part deals with
- Selecting project for research work
- Prepare plan of action.
- Reference Work.
- Literature Survey

Phase II (March 2013 to August 2013)
- Experimental set up
- Practical work for preparation of coadings
- Study of their logics in details.

Part II) Second Year
Phase III (September 2013 to February 2014)
- Analysis of collected data and
- Design the related screens & connections

Phase IV (March 2014 to August 2014)
- Software testing and actual functioning of mobiles communication
- Conclusion of work.
**Methodology:**

A major requirement in the designing of the computerized system is the selection of the correct hardware & software. The main job of the system analyst is to identify which software package would be the best for the proposed system.

**Front End:**

i) .NET framework 3.5 & onwards.

ii) C# & WPF Application.

**Back End:**

i) SQL Server 2008.

**Tools Used For Drawing Diagrams:**

ii) EDraw Max 6.0.

iii) OpenOffice Org Draw.

**Utility:**

1. **Hardware Constraints:**

   i) 32 bit CPU with 8 GB Hard Disk.

2. **Corporate Policies:**

   i) For sending SMS, the SMS gateway is implemented.

3. **Specific Technologies:**

   i) .NET framework 3.5.

   ii) WPF with .NET 3.5.

4. **Database:**

   i) SQL Server 2008.
