Work Plan and Methodology:

RESEARCH METHODOLOGY

This section includes the methodology which includes the research design, source of data, sampling and data collection instrument development.

Research Design

This research design is exploratory and comparative to determine the need of amendments in the Special Marriage Act, 1954

Sources of Data

A - Primary Source:

Personally approaching the people which would include lawyers, couples registering under the Special Marriage Act, marriage registrars within the TMC limits and obtaining relevant details by questionnaires.

B - Secondary Source:

The secondary data has been collected from statistical bulletin published by various organizations, i.e. journals, periodicals, newspapers, law books, precedent judgements of the respective nationalized banks, annual report of Government of India, Government of Maharashtra, Other authorities (bulletin, annual report) and publications and published reports, and marriage bureaus in the vicinity of the research area.

Sampling

A - Sample Size:

Sample size is 100 (within the TMC Limits.)

B - Sampling Technique:

Random sampling technique was used in the survey conducted.

C - Tools of Analysis:
Data has been presented with the help of bar graph, pie charts, line graphs etc. The analysis shall be carried out using SPSS; it shall carry out descriptive as well as inferential statistics. The tests to be used shall be $X^2$, correlation and factor analysis.

**D - Plan of Analysis:**

Tables will be used for analysis of the collected data. The data is also neatly presented with the help of statistical tools such as graphs and pie charts. Percentages and averages will also be used to represent data clearly and effectively.

**E - Research Area:**

Thane (Thane Municipal Corporation Limits)

**Data Collection Instrument Development**

The mode of collection of data will be based on Survey Method and Field Activity. Primary data collection will be based upon personal interview. I have prepared the questionnaire accordingly to the necessity of the data to be collected.
