Objective of the Study

Various factors have contributed to bring about change from traditional to electronic based library operations. Basically ICT is needed in libraries for many reasons. The main objectives of the study are as follows:

1. To study the status of print and e-resources in technical libraries.
2. To study the use of e-resources.
3. The trend of transit from print resources to e-resources.
4. To help in creating network among libraries in sharing resources.
5. To facilitate faster information communication to use e-resources.
6. To reduce the time lag between the demands and supply of information.
7. To have large e-resources and access made available to users.
