HYPOTHESIS

In order to understand the present problem of English, a primary research study will be conducted in Mumbai. An attempt will be made to study SSC Students. It is provided concise overview of research relating to performance of girls and boys studying in schools and committing the mistakes in English due to this negative effect on personality. It has been observed that students have very poor performance in English and face many problems in English due to lack of knowledge of innovative techniques like Memory Development, Mind Mapping Techniques, Concentration Skills, Communication Skills, Time Management Technique, Stress Management, Positive Attitude etc. Also due to poor foundation at the initial stage of schooling and also at home are the reasons. Poor way of learning English as the mother tongue of those students is not English

The teacher plays a very important role in making a subject interesting. But it is seen that most of the teachers also do not have English background. As far as educational qualifications are concerned, many teachers are only B.A. with no specialization in English and have improper teaching experience. The teachers do not have knowledge of innovative technique of teaching as a result they cannot implement the new method of teaching English.

It is assumed that lack of knowledge of English, has an effect on personality of students. If English is improved, personality of students will improve.
