Methodology and work plan

The main purpose of this study is to find out the present status of availability of electronic Resources in engineering institutions of Maharashtra. This study is based on questionnaire method. A questionnaire survey will be conducted to collect the information regarding the use of electronic resources, frequency of use of electronic resources, purpose of using electronic resources, frequency of locating desired information, problems faced by users while using electronic resources.

Work plan

Chapter I-

- Research Title Cover Page
- Introduction
- Objective of the Present work
- Hypothesis
- Methodology and work plan
- Scope and Limitation of the Study

Chapter-II

- Literature Review

Chapter-III

- Data Collection and Analysis

Chapter-IV

- Suggestion and Conclusion
Scope and Limitation of the Study

This Study gives an integrated picture of research trends in the field of engineering Science by Providing Survey Methodology Study.

The Present research is Limited only for Electronic Resources published in English Language in the engineering Science.
