OBJECTIVES OF THE STUDY

The main purpose of the study is to identify the problems encountered by small and tiny industries and thereby to suggest some measures that would resolve the problems. The detailed objectives of the study are as follows:

1. To examine the growth and working of small scale sector along with a description of the role played by the Central and State Governments in financial assistance.
2. To examine the impact of financial problems faced by sample units and the role played by financial agencies.
3. To investigate the reasons for sickness in the small and tiny sectors in order to suggest suitable measures for the revival of such units.

HYPOTHESES

The following null hypotheses have been formulated to find out the relationship between the attitude towards the impact of financial problems responsible for sickness of small scale industrial units and social factors.

\[ H_0 = \text{There is no relationship between educational background \& experience of the entrepreneurs and their attitudes towards the impact of financial problems responsible for sickness.} \]

\[ H_1 = \text{There is relationship between educational background \& experience of the entrepreneurs and their attitudes towards the impact of financial problems responsible for sickness.} \]
