5. WORK PLAN AND METHODOLOGY:

This study is consistent with a qualitative paradigm. It is one way through which e-banking frauds can be reduced if not eradicated. The research will be explorative in nature where the phenomenon of the prevention of e-banking frauds and the assistance provided will be studied. Using an indicative approach, the researcher will start studying a single phenomenon as it emerges. Descriptive method will be used up in the research design. The research method for a study has different stages and strategies to work on the issue. The mode by which data will be collected are research tools. The survey method will be used. Based on the nature of the study most appropriate method is selected that can answer the questions related to the objectives and hypothesis of the study. For gathering the data on the quantitative paradigm using Dominant-Less Dominant Design will be used. All informants and documents will be purposefully selected. Those units will be selected that will best answer the research question.

Research Design:

In this study the researcher will study the phenomenon of e-banking frauds and effective solution for preventing such crimes. To compliment this data, a small quantitative and qualitative study will be done to determine the overall out reach of the banks providing the help and aid to the society for preventing them from e-banking frauds.

Method: Survey method will be used.

Research Technique: Sampling Technique will be used for conducting the survey.

Selection of Sample: Sample will be selected by random sampling.
Work Plan

1. In the first six months researcher will complete the 1\textsuperscript{st} and 2\textsuperscript{nd} Course Work.

2. In the next six months researcher will work on collection of data, preparation of chapters for thesis mainly first and second Chapter also will start working on summary.

3. In next six months researcher will submit the summary by finally completing data analysis and finding conclusions.

4. In next six months the researcher will submit the final thesis.
