1) **Introduction** -:

Books are man’s best friends and its contribution is of great importance in his life. books are called a treasure house of knowledge as they continuously record man’s imagination, thoughts, emotions and experiences every generation reads these books with great enthusiasm.

Books offer valuable tips on different aspects related with the subjects and help develop the whole personality of man they give man company equally in time of happiness as well as in times of distress. They are of the main sources of knowledge the books provide the knowledge and the wisdom that are to be imbibed and made a permanent part of one’s life. They are so significant that every generation uses and read them thoroughly the age in which we live is the age of information technology many of us are settled in various countries. They live thousands of miles away from their native places. Books is a means of communicating man’s thoughts and emotions. They also introduce man’s behavior, tradition, cultures experiences. Such literature will be made available to men living abroad.

A library is prominently considered as a treasure house of knowledge. It is also called a brain of institution. Books are kept and arranged properly which makes the reader look for a particular book easily. It consists of books, magazines, journals, newspapers, manuscripts as well as audio visual aids resources likes records, tape-recorder, CD, microfilms, DVD, which have become very essential material in modern era of information technology. It is observed that reading materials in library have been increasing day by day.

It was possible to find out the books issued to library member when there were less number of books in library. But today we know that there are thousands of books kept in library and at the same times the number of readers are also increased. The library employees are suffering innumerable questions in respect with the smooth process of issuing and receiving books. similarly, It has to provide them modern multi- facilities. Many employees are working in library it seems to make plans and their untiring efforts should be given priority as per its importance and therefore the management of library seems to be updated for proper working and providing facilities with modern techniques.

But in recent years, requires avail very influential management in order to provide maximum information to curious scholars in less effort. Presently information technology has helped in improving the library facilities. Hence management system used to provide modern facilities from last fifty years. Internet has revolutionized the concept of library. Information technology plays a very unique role in improving and reforming the library facilities.
Books are issued to a member of a library for a particular period and take them home. They are issued by library employees. In modern times a library consists of thousands of books in stock. It has books on various topics, subjects and events. It is always observed that some of them are frequently read or used library contains both less useful books as well as more useful books. The books which are more valuable are demanded again and again by readers. They should be added from time to time. But it is also true that some of the books are rarely used or read by readers. Library employees play very substantial role in the development of it. The real success of any library lies in the services of its employees. It can be analyzed whether the development and management of libraries are powerful or not. That is why an attempt survey method shall be used.

All the books are kept systematically. They are classified and indexed as per their subjects. The title of books assists the readers to get a particular book without wasting time, similarly an attempt shall be made to study what reading materials are available and resources are being employed for selection of reading materials in different libraries of engineering colleges in western vidarbha. If necessary, questionnaire will be also prepared. It is also significant to know the continuous growth of reading books in every years and income and expenditure of libraries in every year. Whether library grant is availed for its development or not. An attempt shall also be made to study its development and management. Data shall be collected through interviews, questionnaires are part of the select research work. It is equally important that research work might be done before this. But my research work is a new creation, development and management of engineering college libraries in western vidarbha region an analytical study has become very needful. This document will prove to be very significant research work.
