Introduction

“Education is a liberating force and in our age it is also a democratizing force, cutting across the barriers of caste and class, smoothing out inequalities imposed by birth and other circumstances.” As said by Indira Gandhi; a teacher plays an important role in imparting education. Teacher is the architect of the future. A student can get proper guidance by the teacher. No one can deny the role of ICT in education. Smart classes, powerpoint presentations and AV devices are becoming a handy tool for the educators to improve the effects of teaching learning process. Technology is findings newer and newer ways to enter in our day to day life. World is progressing rapidly with the help of computers in a very short time, Man has brought about his own progress computer has become part of life and its scope is increasing day by day. Computer is a must now one cannot do without computers eg. Education, Banking, Science, Business, Sports, Tourism etc. in all these lines work has become difficult without computers It is very useful and helpful in the teaching and learning process therefore,Computer have created a revolution in the content of education and in the nature of learning process they have the capability of multiplying the human intellect beyond part conceptions and have tremendous implication in education. No one can escape the effect of technology in bringing in new changes in our society. Nowadays technology is the main support for the students. Any source of information can be easily accessed with the help of computer. Computer is the main technology support as a tool for the learning process. Computer based instruction provides technical progress in student learning process. That is why computer works as a productivity tool and has a great role in education. Computer includes hardware and software which further works as a reflective medium to education. Computer provides facilities and supports to students’ educational life. Computers are nowadays working as an updated resources not only for education but also for the
social, cultural and economical life of the students. Higher Secondary education is the launching pad for the students to reach the heights of success in future. It is this stage of education process which introduces and strengthens the subject that helps the student to understand and analyse the subject matter, which provides them future opportunities for career development and employment sources. Computer has become one of the most important subjects to be learnt by area of different subjects. It is left to the students to select subjects of their choice. However, the selection of the subject depends on their utility and marketability. The subjects of computer education possess both of these qualities and hence have become more popular and widely acceptable. So computer knowledge becomes a must for all the students, working class, professionals and academicians. The present researcher will try to find the attitude of higher secondary school students towards computer education in context to certain variables.
