WORK METHODOLOGY:

In every process scientific and systematic approach is required. The scientific and systematic process is called methodology. There are different methodologies which can be used in educational research.

In this research, researcher used survey method. The conclusion will be based on the observations and reviews, therefore, it will be consider useful in following things in teenagers. 1. Behaviour 2. Pressure of peer group 3. fear 4. Acceptance about failure 4. High aim 5. Relation with their parents 6. The view towards life.

As some points will be considered in the questionably.

1. To study the behaviour problems in the students of adolescence age group.

Design of the Study

The present study is a status study, which did not require the investigator basically to manipulate any of the variables included in it. Rather the collection of data became instrumental in providing correct insight into the Behavior Problems, which cannot otherwise be assessed. It was not intended to study the interaction among various variables.

Selection and Description of the Tools/Questionnaires

The tools/questionnaires used in this study for the collection of the data were selected because they were found to be most reliable and have been widely used in the profession of physical education and sports throughout the world. The reliability and validity quotients as given in the manuals of the respective tests are as under:

Selection of Variables

In the present study, care was taken to pin point the variables for behavior aspects which were not only relevant but also closely related to the purpose of this study. Behavior questionnaire is used in the study.

Selection of the subject:

The present study will conducted from 10 selected schools from Kalyan City. The research will take the 20 student from each secondary schools.
**Data Analysis:**
Data analysis will be done by primary and secondary sources:
Primary Data:- The primary data will be collected from the questionnaire.
Secondary Data:- The secondary data will be collected by journals, books, articles etc.

**Statistical Analysis:**
Mean, Standard Deviation and Percentiles will be used in this study.

**Conclusion:**
On the basis of the findings of the study, the following conclusions are drawn:

1. According to the study we can observe the behavior change in adolescences
2. Behavior can change due to stress.
3. Behavior can change due to emotions.
