Methodology

For the present study it will be essential to take a brief review of the researches done in India. After getting good idea of the background, the researcher will be using the experimental design.

Tools of the Study:-
- Achievements Test: Pre-Test and Post-Test.

Population of the study:-
The Population of the study is related to students of all aided and non-aided English Medium schools of Maharashtra.

Sample of the study:-
The researcher decided to take purposive random sampling method. The sample will be chosen in such a way that each student will have an equal chance of being selected and its choice is independent of any other choice to draw out valid interferes. The researcher decided to take approximately 5 English medium schools for her research work. The researcher decided to take random sample of 40 students for each school.

Variables of the study:-

1. Independent variables:-
- Training Programme in Marathi language skill.
2. Dependent Variables:-
   - Experimental and Control group.

Tabulation of the data:-
After the Data is collected the researcher will be using measures of central tendency. Based on the data derived a t-test and other statistical Analysis might be used. Both qualitative and quantitative methods will be used to represent the data.
Work Plan

Chapter 1: Introduction
Chapter 2: Literature review.
Chapter 3: Research Methodology
Chapter 4: Results and Discussion
Chapter 5: Conclusion
