METHODOLOGY

To start with, study will be concluded by taking responses from students between the age group of 12-18 years belonging to middle class with working parents with special focus on the role of working mothers.

Data will be collected through both the Primary as well as Secondary sources.

Primary Data will include Questionnaires and Interviews from the respondents i.e. Children of working mothers and their working mothers.

Secondary Data will be collected from the Websites, various journals, reports, books, case studies and other forms of published material, such as surveys by the news papers, voting on internet portals etc.

Sampling Methods will be Simple Random and Stratified as the strata's will be on the basis of difference in age and on the categories decided (Educational, Emotional and Social)

Sample Size will include around 500 responses from the Children of working mothers and 300 responses from the working mothers.

Analysis will be done using SPSS.

Tools will include:

- Questionnaires
- Interviews
- Observations
- Correlation
