OBJECTIVES OF THE RESEARCH

1. To compare and contrast BWA with existing large population approaches.
2. To understand the factors that restrict/facilitate the adaption of BWA
3. To determine the penetration level of BWA amongst the users and the types of users and their attitudes towards acceptance of alternate BWA technologies.
4. To study and understand the approach of TSPs towards BWA and the challenges faced by TSPs in its implementation.
5. To study and understand the comparative benefits of alternate BWA technologies and TSP attitudes towards their implementation.
6. To try and surmise the BWA scenario in the coming years.
