**Research Methodology:**

In order to achieve above objectives following methodology is adopted. Researcher is going to follow descriptive as well as exploratory research.

**Descriptive Research Design:** For this study main objective is to acquire knowledge. Analysis can be done through case study method or statistical method.

**Exploratory Research Design:** This is also called as formulative research design. This aim at formulating a problem for more precise idea or hypothesis. Based on this, the subsequent stages of research could be planned. As this design is only of formulative type, it should be highly flexible.

**Collection of Data:**

1. Primary data collected through appropriate questionnaire.
2. Secondary data collected through books, magazines, newspapers, and websites.

**Analysis of Data:**

The primary data collected will be analyzed by application of Ms-excel.

**Population and sample:-**

The population for the study is the entire working women class in India. Working women in the age group of 25-40 yrs are selected for the study. Mumbai city is selected as geographical area for the study. However, for the purpose of the study sampling technique used is random sampling method. Initially our sampling size will be 200; based on the response it may be changed.
