I. **Hypothesis**

Hypothesis is a raw finding which provides new line of understanding for feature explorations. In this work following are the hypothesis-

1. Women entrepreneurship is facing challenges and difficulties due to socio-economic conditions.

2. In the traditional society it is difficult for women to sustain their own business.

3. Production services developed by women are of high quality and they can compete other products in the market.

4. The women entrepreneurship can strengthen Indian economy in general and Maharashtra in particular.
