METHODOLOGY

Methodology is the systematic, theoretical analysis of the methods applied to a field of study. It comprises the theoretical analysis of the body of methods and principles associated with a branch of knowledge. This research will include primary and secondary data. This study will adopt an analytical and descriptive approach based on observations, Interview Schedule and Questionnaire.

PRIMARY DATA COLLECTION

The primary data will be collected from women in Delhi by Interview Schedule and Questionnaire.

SECONDARY DATA COLLECTION

The secondary data will be collected by analyzing history. Text from research articles, publications, libraries, and journals related to the research will be collected, analyzed and documented.

SCOPE

The number of women in the decision-making bodies, which presently are only handful, should be increased so that the women issues which seem baseless and irrelevant for men should be taken note of by these women so that they could find a place in the National policies of our country.

The issue of gender discrimination and its elimination at all levels must be made the priority item in the social, political, economic and other agendas of all political and social organizations.
