An analytical study of “Violence in Assam since 1947” wants to express the following hypothesis.

1. It is assumed that the violence related to the religious emotion.
2. It is assumed that the maximum violence occurred backward areas of Assam.
3. It is assumed that huge unemployment problems encouraged to violence.
4. It is assumed that violence badly affected to socio-economic system in Assam.
5. It is assumed that role of some political leaders fertilize the violence in Assam.
