WORK PLAN AND METHODOLOGY

WORK PLAN (DATA COLLECTION METHOD)

- **STEP I:** The investigator obtains permission from the respective authority & the ethical clearance to conduct the study
- **STEP II:** Selection of sample from the students, studying in Kodoli, Kolhapur district, from selected colleges
- **STEP III:** Obtaining the informed written consent from each student.
- **STEP IV:** To assess the knowledge through structure questionnaire on knowledge of cardiopulmonary resuscitation
- **STEP V:** Administering the awareness programme about cardiopulmonary resuscitation for students.
- **STEP VI:** Conducting the post-test to assess the effectiveness of awareness programme on knowledge of students.
- **STEP VII:** Analysis of collected data & interpretation.

METHODOLOGY

**RESEARCH APPROACH:**
Quantitative approach.

**RESEARCH DESIGN**
Pre-test and post-test design

**SAMPLING TECHNIQUE**
Random sampling

**SAMPLE SIZE**
250 samples will be collected from students studying in Kodoli, Kolhapur district

**SETTING OF THE STUDY**
Study will be conducted in Kodoli, Kolhapur dist
