Hypothesis

Statement(s) of hypothesis:

A Hypothesis is an unproven statement or proposition about a factor or phenomenon that is of interest to the researcher. It is a possible answer to the research question. Hypothesis are declarative that can be tested empirically. An important role of hypothesis is to suggest variables to be included in the research design.

Based on the proposed field of Study given above and the Objectives identified, the following hypothesis have been formulated to address the research area:

HI  There is a significant relationship between the successes or failure of a family managed business and Succession Planning

HII  There is a significant relationship between the successes or failure of a family managed business and how family business dynamics are handled.

HIII  There is a significant relationship between the successes or failure of a family managed business and developing a strategic vision and building teamwork.

HIV  There is a significant relationship between the successes or failure of a family managed business and next generation HRM and leadership perspectives.

HV  There is a significant relationship between the successes or failure of a family managed business and Professionalism.

HVI  There is a significant relationship between the successes or failure of a family managed business and making the most of outside resources.
