RESEARCH METHODOLOGY

Region of Research

The geographical location of the study is the State of Rajasthan.

Since I have been born and brought up in Rajasthan, I am well versed with the social set up and family norms for the girl child of the family.

Research Method

The research conducted will be Descriptive and Analytical in nature. Statistical method will be used to find out the result.

Basically there are three types of research methods—Historical method, Descriptive method and Experimental method. My research falls in the category of descriptive study, where the researcher proposes to use the Simple Survey Method.

Data Gathering Technique

Questionnaire will be prepared to collect the data.

Women, social workers, etc. will be interviewed for the collection of data.

House to house field visit will be conducted for the data collection.

The collected data will be analyzed qualitatively and quantitatively by using statistical techniques. There are different methods of analysis namely percentage, ranks and percentile ranks, measurement of central tendency, variability, error and probable error etc. While analysing the data for the present study, the researcher will apply few of the above.
