Research gap

In the field of a comparative study on job satisfaction of private and government employees in Kanpur in this area huge research are left or we can say short research are done in this area. So I want to full fill this gap through this research. Like as the point of view of the employees of government sector and private sector in the field of job satisfaction.

Objective(s) of the Study

1. To identify the present scenario of employees satisfaction in government sector and the private sector.
2. To identify the factors which are libel for job dissatisfaction to the government and the private sector employees?
3. To analyzing the impact of employees job satisfaction on their job performance.
4. To provide the best solutions and suggestions towards problem communicate regarding employees satisfaction in the government sector and the private sector employees.

Research Hypothesis

1. \( H_{01} \) There is no relationship between job satisfaction and their work performance of employees.
2. \( H_{02} \) There is no relationship between job satisfaction and the working condition of the employees.
3. \( H_{03} \) There is no relationship in productivity and job satisfaction.
4. \( H_{04} \) There is no relationship between the level of job satisfaction of government and the private sector employees.
