Hypothesis of the study

To realize the objectives of the study the following null hypothesis have been developed for empirical testing:

- The study of communication skills and its mechanism is required to be understood by everyone for creating good business environment in an organization.
- It is also implied to know the barriers and hindrances in interpersonal communication at the organizational level and thereby learning the aspects of effective communication for congenial business milieu.
- It is also obligatory for all the business personnel to develop a set of interpersonal communication skills for smooth functioning through the different modules and stages to develop the communication.
