WORK PLAN:-

PHASE-I

➢ Information gathering

➢ Graphical representation and designing.

➢ Collection and Analysis of data in social networks.

PHASE-II

➢ To study models of SNS.

➢ To deploy the setup with different databases.

➢ To understand Java Agent Development Environment architecture.

PHASE-III

➢ To develop different agent with the GUI of JADE Tool.

➢ To test the setup with different testing strategies.

➢ To study the deployment of Java agent.

PHASE-IV

➢ Pre-thesis evaluation.

➢ Thesis Writing
6. METHODOLOGY

Research methodology defines how the development work should be carried out in the form of research activity.

Methodology to expert systems design

1) Problem situation unstructured.
2) Problem expressed.
3) Root definitions of relevant systems.
4) Conceptual models.
5) Comparison with 3 and 4.
6) Definition of feasible desirable changes.
7) Action to solve or improve the problem situation.
