METHODOLOGY

Research approach indicates the procedure for conducting the study. In order to accomplish the objectives of the present study, a descriptive survey approach is used to explore nursing students’ perceptions toward teacher behaviour and personality and its impact on academic achievement and performance of clinical practices.

WORK PLAN

1. Define problem statement
2. Identify objectives in lieu with the problem statement
3. Perform comprehensive literature survey
4. Ascertaining whether the objectives can be achieved by performing feasibility study
5. Recognize the assumptions and limitations needed to implement the concepts specified in objectives.
6. Selection of appropriate tools and technologies that syncs with the ideas
7. Implement the work using appropriate tools
8. Finalize the framework which can be adapted in real world
9. Identify a use case and perform implementation, testing and validation to show its working
10. Publish papers in reputed International Journals and Conferences
11. Thesis writing and reviews
12. Prepare PPT slide for presenting the work
