HYPOTHESIS

[1] H₀: organizational structure of family owned meat exporting industries and progress of the meat export industries are independent of each other.

H₁: organizational structure of family owned meat exporting industries and progress of the meat export industries are not independent of each other.

   H₁: P > .80

   Where P denotes percentage of industries whose meat export is in volumes of 100 crores per annum and if P is above 80% we say that because there is effective organizational structure it leads to flourishing of meat export industries.

[3] H₀: μ_A = μ_B
   H₁: μ_A > μ_B

   Where μ_A,μ_B denotes average performance of industries A & B respectively.
