HYPOTHESIS

There are more than 20 Teaching departments in Amravati University Campus. That are serving great for the requests of neighborhood populace. It is assumed that every one of them are having a better created foundation & digital library facilities for the students and the staff individuals. It is expected that every user is happy with the current administrations rendered by the individual library in the area, yet there are some problems which are faced by the user. So it is expected that the users may give some valuable suggestions to improve the existing collections and the services in a particular Digital library. Thus the Research study will investigate the behavior of user in digital library environment, and also the library use and information seeking behaviour of academics at SantGadge Baba Amravati University Campus, Amravati.
