Methodology

Research methodology is a systematic way to solve a problem. It is a science of studying how research is to be carried out. Essentially, the procedures by which researchers go about their work of describing, explaining and predicting phenomena are called research methodology. It is also defined as the study of methods by which knowledge is gained. Its aim is to give the work plan of research.

The Study Plan

The study focused on the Electronic Voting machines. The proposed study is a fact-finding research. For meaningful analysis and for making valid suggestions based on the findings of the study. The data for the study has been collected mainly from secondary sources comprising various journals, patents, books, periodicals, newspapers and court ruling etc.

Initially the theoretical study of existing Electronic Voting Machine & the security aspects will be taken care of in order to understand the shortcomings in the existing model or architecture.

Depending upon the findings of the study proper solution will be proposed for the identified problems.
Area of Research Work

1. Indian Voting System

2. Indian Electronic Voting machine

3. Security Features in Electronic Voting Machines
