NEED FOR THE STUDY:

Many researches’ have been done in this area at various levels of education especially at the higher levels of education and at teacher training levels. The teaching competency depends mainly on several factors and not on any one factor. It may be brought to notice that a committed teacher may not be very good at classroom teaching and mastery of the content and a competent teacher who has mastery over his/her subject may not have professional commitment. If the teachers have a negative attitude towards the profession then it will have an influence on the commitment and vice-versa. The teacher who is committed to the profession may never complaint of the workload or the number of extra hours she has to dedicate in her teaching irrespective of the fact she is paid according to the pay scale or not. A committed teacher should be able to cope with the latest teaching techniques, methods and other audio visual materials for enhancing learning. All these depend on the efficiency and competency of a dedicated and committed teacher. If the teacher will not have a positive attitude and proper work commitment then they will not go to school on time and do proper evaluation of the students, as they are not planned to do their work on time. They will not follow the ethics of the profession and will be outdated in the subject.

The researcher feels that the future of the country lies in the hands of the teachers. They are responsible for molding the students as true citizens by inculcating the right values in their minds. This is possible only if the teachers have a positive attitude towards the students and only if there are truly committed to the profession. Hence the researcher feels that some studies have to done at the grass root level i.e in the school teacher’s attitudes and work commitment which they show for their profession.
