HYPOTHESIS

1) There is a significant positive correlation between the curriculum the girl child has studied and her success in life.

2) The general belief is that the aim of education is to earn a living. The aim of education is not merely to make money. Education is a means to develop personality.

3) The woman should be mentally trained so that she can be a good mother and the master of any situation in which she finds herself.

4) Mental training is essential for any kind of work and it is all the more necessary for modern woman who has many opportunities to show her capability. At the same time, the intellectual development of a woman should not mean the neglect of the cultural side.

5) “Education is a means to an end, the end being to appreciate the beauties of life and to make the best use of one’s opportunities. This being the purpose of education, it is most vital thing both for a man and a woman”. A woman cannot ignore the emotional side of her nature to appreciate the beauty in life and make life worth living.

The above hypothesis shall be supplemented with additional sub hypothesis.
