WORK PLAN and RESEARCH METHODOLOGY

Primary data
The primary data will be collected on the basis of sample survey method. During the recent years the sample survey method has been used in research to ascertain information necessary for answering certain questions about specific models/systems.

Research Area:
The questionnaire should cover the following research areas:

Sample size:
The sample size is 100. Steps were taken as far as possible to ensure that the respondents were selected impartially and they would give a true representation of the sample.

Sample technique:
The researcher has used purposive sampling technique and collected information from employees who can provide best information on IOSCO standards.

Sources of Data:
The sources of data is from RBI, SEBI, IRDA, PFRDA, AMFI, FEDAI, FIMMDAI, NSE, BSE, NSDL, CDSL NSCCL, BOISL etc.

Analysis of Data:
The analysis of data was done to see to what extent the IOSCO guidelines are met.

Arrangement of chapter for the thesis
Chapter:
1. Introduction
2. Review of literature
3. Research methodology
4. Analysis of the Data
5. Findings, Suggestions and conclusions

Secondary data:
Secondary data is collected from the following sources:
1. Research journals
2. PhD and M Phil dissertations
3. Various central and state government publications
4. Public records and statistics
5. Books, Magazines, newspapers and periodicals and
6. Other relevant web sites
